## Notes

This Graveyard Plan was created from a current survey of the visible monuments in the burial ground along with aerial photographs. This has been cross-referenced to a historic survey of the visible inscriptions created by the Birmingham and Midland Society for Genealogy and Heraldry in 1994. Where possible, entries have also been cross-checked with the burial register.

In addition there exists a hand drawn plan of the graveyard which appears to have been made in around 1990 (judging from the date of the last grave included). This plan included the site of a number of graves in the bottom left quadrant of the graveyard, as viewed from the entrance, for which there are now no visible markings. It is not known on what evidence these grave sites were included, it is possible that there were memorial stones which have since been removed or laid flat, or it may have been based on a degree of guesswork. They have been included for completeness but their location is indicated in the list of graves as "speculative".

Note: Grave numbers prefixed by C, i.e. C1 to C5, refer to plaques on either side of the entrance path walls marking burials of ashes.

A summary of the St Leonard's Wroxall burial register is also included covering the period from 1898 when the first burial is recorded in this graveyard, up to 1993. Prior to 1898 burials were in the graveyard of St Leonard's church at Wroxall Abbey, and it is believed that members of the Dugdale family continued to be buried there after 1898. Burials after 1993 continued to be in this graveyard but are registered in the Honiley burial register.

This document and the plan is also published on our website at <http://rowingtonrecords.com/Church>

A full version of the plan is published there which can be zoomed to make it easier to read the numbers
